Microsoft Office Recovery Software

Office Recovery Software Download

Hetman Uneraser is designed to meet Microsoft Office Word and Excel recovery requirements of users. **Office recovery tool** is competent in searching and recovering data from files that get deleted due to reasons like media corruption, unexpected system shutdown, virus attack or other opening errors.

Hetman Uneraser provides the user with complete recovery software to **recover lost data from deleted Word, Access, Excel, Publisher and PowerPoint files.**

You can preview the lost data of a file before recovering it. This is especially useful if you want to find a file among many similar files appeared after the extended analysis, because in this case file names are missed.

[Hetman Uneraser](#) estimates chances of successful recovery for each deleted file. If chances are small, you will probably recover the file only partially. In this case some parts of the file can contain incorrect data.

If you quick format a partition, Hetman Uneraser still tries to show files that were on it before formatting. If a file record was not completely overwritten with a new one, you will see the file in the list and will be able to recover it. You can also search for deleted partitions on the disk and recover files from them.
